

Mylius 76

The popularity of Mylius Yachts' all-carbon fast cruising range from 50-76ft continues with news that the first of its new flagship 76, called *EGi4*, has launched in La Spezia. Three more Mylius 76s are in construction, including two flush deck models, alongside three Mylius 65s and one Mylius 50.

Alberto Simeone, the designer who helped found Mylius over a decade ago, is responsible for the powerful lines of all models. Hulls are built at the Rega yard in

Poland, an efficient subcontracting model that keeps costs competitive and goes some way to explaining Mylius's current popularity.

The Mylius 76 is a lightweight flyer. She weighs the same as the Euphoria 68 (page 72) and offers the same accommodation arrangement of a three-cabin layout with crew cabin in the bows. Going below on a Mylius is quite an eye-opening experience. As with past models, this 76 has stark, angular, modern styling, finished boldly in white, black and teak. **Price ex VAT €2.65m (£2,05m). www.mylius.it**

Above: finished in bold black, white and teak, this new 76-footer is angular and modern
